JOSHUA KIVARIA

DATA ANALYST

Dartmouth, NS | joshuakivaria@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Data Analyst with a Computer Science background and experience supporting enterprise healthcare and international data initiatives. Delivers Python, SQL, Excel, and Power BI analysis across data cleaning, validation, reconciliation, and quality control across large, complex datasets. Works across clinical, administrative, and IT teams to turn inconsistent data into reliable records and usable insights.

SKILLS

Programming & Analysis: Python (Pandas, NumPy), SQL; Relational Databases
Visualization & Reporting: Power BI; Tableau; Matplotlib; Seaborn; Dashboard Development; KPI Reporting
Analytics Methods: Data Modeling; ETL Pipelines; Data Reconciliation; Requirements Gathering
Data Governance & Delivery: Data Quality Assurance; Data Governance; Healthcare Data Management; Metadata Standards
Tools: Microsoft Excel; Git; GitHub

EXPERIENCE

Data Analyst | **IBM (via Experis)** | Halifax, NS | March 2026 - May 2026

- Supported Nova Scotia's One Person One Record (OPOR) healthcare initiative by processing and maintaining large volumes of digital records to enhance data accessibility and accuracy.
- Partnered with clinical, administrative, and IT teams within the OPOR program to gather requirements and facilitate data-driven decision-making for unifying patient health records across the healthcare system.
- Ensured full compliance with HIPAA and PHIPA regulations throughout OPOR data processes, upholding strict privacy and security standards in the handling of consolidated patient health information.
- Supported migration of legacy healthcare data into the OPOR platform, ensuring data integrity and continuity of care during transition of fragmented records into a unified, person-centered system.

Data Content Intern | **Food and Agriculture Organization (FAO, UN)** | Rome | September 2025 - December 2025

- Developed and maintained geospatial datasets for agricultural analysis, applying international metadata standards (ISO 19115, DCAT) to enhance interoperability and data quality across FAO systems.
- Contributed to frontend development of the Hand-in-Hand Platform, resolving UI/UX bugs, refining visual layouts, and improving accessibility using TerriaJS, React, and CSS/SCSS.
- Collaborated with IT officers and HiH coordination team to publish datasets and technical notes, supporting FAO's digital public goods and data transparency initiatives.

End User Support Technician | **Saint Mary's University** | Halifax, NS | November 2022 - December 2024

- Analyzed service and incident data to identify recurring technical issues, recommending specific workflow improvements to enhance support processes.
- Managed data accuracy and access through Active Directory and Microsoft Azure, ensuring secure and streamlined user access.
- Provided clear technical explanations to non-technical users, improving stakeholder understanding and satisfaction.

PROJECTS

COVID-19 Data Analysis | SQL, Tableau

Analyzed global COVID-19 infection, vaccination, and mortality data using SQL, applying joins, CTEs, aggregate functions, window functions, views, and exploratory queries to identify trends across countries. Developed Tableau visualizations to communicate key findings.

Data Jobs Market Dashboard | Power BI (In Progress)

Developed an interactive Power BI dashboard to explore data-related job trends and present key metrics through visualizations, filters, and summary indicators for easier analysis and comparison.

EDUCATION

Bachelor of Science in Computer Science | Saint Mary's University | Halifax, NS | November 2024
